Representing Fractions

Mixed Numbers and Improper Fractions

Page [1 of 1]

Example 1

1. The fifth largest meteorite found in the United States is named the Navajo. The Navajo weighs $\frac{12}{5}$ tons. Write $\frac{12}{5}$ as a mixed number.

Example 2

Write each mixed number as an improper fraction.

2. $1\frac{1}{4}$

3. $2\frac{2}{3}$

4. $1\frac{2}{7}$

5. $2\frac{2}{5}$
